SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>There is the discrepancy between the numbers of adult haematological malignancies which were analysed. It is described in Abstract that 7.8% of all malignancies are adult haematological malignancies. However in Discussion, it is stated that adult haematological malignancies presented 10.5% of all malignancies during the same time period.</p> <p>The abbreviation HM (haematological malignancies) is first used in Abstract but it is not cleared before Introduction.</p> <p>Please, enter a space between words and between sentences. In Introduction : A studyconducted in Northern Nigeria showedprevalence 19.8% with malepreponderance and chronicleukaemiapredominantly^[11]. Another study in the Southwest Nigeriareported a prevalence of 18.05% of all cancer with male preponderance and NHL predominantly^[10]. Similar study conducted in Benin South-South of Nigeria, showed a prevalence of 17.4% with male preponderance and NHL predominantly^[12]. There is paucity of information on the epidemiology of adult haematological malignancies in our environment, thusaim of this study was to describe the epidemiological pattern of HM in Calabar with a view to reawaken the consciousness of burden and pattern of distribution of Adult haematological malignancies inthe sub region.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
