

**Editor's Comment:**

“Response of Upland Rice to Nitrogen and Phosphorus Fertilization  
on Vertisols of Tigray, Ethiopia”

This a valuable research at both technical and economic point of view, with good reporting. Reviewers suggestions are reasonably well accounted for.

Just a small detail to be corrected however: at the end of conclusion, please write : “69 kg N ha-1 and 30 kg P ha-1 ” (or as well: “69 kg ha-1 and 30 kg ha-1, respectively”)

This paper clearly deserves publication in the Asian Research Journal of Agriculture.
