Editor's comments:

There are lot of grammatical errors in the text. Eg Remarkable difference 'was showed' instead of 'was shown'. Let the authors do the corrections. in the abstract section 'the experiment exhibited that' instead of 'the experiment shoed that'. 'Total numbers of plots instead of 'total number of' plots.

Also, let the authors state the recommended doses of the fertilizers used. Be specific and factual.

Author's feedback:

We have reviewed the grammatical errors in the manuscript.
