SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The introduction provide sufficient background and include all relevant references. The research design is appropriate. The methods are adequately described. The results are clearly presented. The conclusions are supported by the results.	
Minor REVISION comments	To achieve greater clinical relevance, the number of measurements made to patients could be increased. It would be interesting to extend the follow-up time after 6 months and a year to finalize the study.	
Optional/General comments	I find this study with the subject "active exercise" in pain and disability therapy very interesting and necessary, because we need movement to recovery a patology muskuloskeletal. And this is a scientific and well done research. I like it.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> Yes. The authors add the ethical issues according to the standards of the Declaration of Helsinki, all subjects provided written informed consent before data collection. Approval was obtained from the Institutional Human Ethics committee, PSGIMSR,Coimbatore. (Ref.No:16/364)
