

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Research and Reports in Gastroenterology
Manuscript Number:	Ms_AJRRGA_44395
Title of the Manuscript:	Prevalence and pattern of NSAID consumption among patients with upper gastrointestinal bleeding
New title:	Prevalence and pattern of NSAID consumption among patients with uppergastrointestinal bleeding_ a case-control study
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Could the author consider the title "A case-control study on the risk of UGIB in patients taking NSAIDs in Masshad, Iran" – because once s/he says "prevalence and pattern" it gets confusing Results section – Tables 3,4,5 can be made into graphs Line 178, 179 discuss a Table 6 which is not present. Line 188 – table 7 is supposed to be table 6 The paper is still too long, it could be shortened further.</p>
