General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There are not.	
Minor REVISION comments	Figure 2 and Figure 3 are very similar. Why two? In table 4 may be useful a reduction of columns: all strains are: Gram negative, non-spore forming, non-capsulated bacilli and with mobility . May be better write only one time in legend these words. In tables there are a lot of ugal and repetitive values. Better may be use * in legend, instead of a long series of 10%, 10%, 10% and so on. 0 is 0, why cite 0%? Instead of Figure 1, reported by Prescott, may be better a graphic or a picture made by Author and useful to describe process. There are some corrections to make in the text. Temperature of 25°C, perhaps is to adjust.	
Optional/General comments	Work is interesting and in line with crescent interest in health improvement in these Countries.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
