**Journal Name:** Journal of Advances in Mathematics and Computer Science  
**Manuscript Number:** Ms_JAMCS_49466  
**Title of the Manuscript:** Perturbation approach in the dynamic buckling of a model structure with a cubic-quintic nonlinearity subjected to an explicitly time dependent slowly varying load  
**Type of the Article:** Original Research Article

**General guideline for Peer Review process:**

This journal’s peer review policy states that NO manuscript should be rejected only on the basis of 'lack of Novelty', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**PART 1: Review Comments**

<table>
<thead>
<tr>
<th>Compulsory REVISION comments</th>
<th>Reviewer’s comment</th>
<th>Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</th>
</tr>
</thead>
</table>
|                              | Highlight the part which was originally modelled by the authors that has not been reported before. For ready reference please see the following manuscript.  
"Asymptotic Investigation of the Buckling Of a Cubic-Quintic Nonlinear Elastic Model Structure Stressed By Static Load and A Dynamic Step Load" |                                                                                                                                 |

**Minor REVISION comments**

**Optional/General comments**

Very generic approach is adopted throughout this manuscript

**PART 2:**
