**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The reference style is not according to the journal format.</p> <p>The species names should be as per format.</p> <p>The loss on drying should be given and also reason should be given for the variation without this it is only the accumulation of data not a research</p> <p>The graphs are not clear and the quality of graphs should be improved</p> <p>The conclusion is just a summary of results not the conclusion from the research that which method should be preferred</p>	
<b>Minor</b> REVISION comments	<p>There are language problems specially in introduction, so may be rewritten and checked carefully</p> <p>There should be no parenthesis in the title</p>	
<b>Optional/General</b> comments	<p>It seems the author has just concentrated on the results not the reason for these results, so they should set together on a cup of coffee and think of all the reason and the impact of the methods on the outcomes</p>
