**General guideline for Peer Review process:**

This journal’s peer review policy states that **NO** manuscript should be rejected only on the basis of 'lack of Novelty', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdí-general-editorial-policy#Peer-Review-Guideline)
### PART 1: Review Comments

<table>
<thead>
<tr>
<th>Reviewer’s comment</th>
<th>Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</th>
</tr>
</thead>
</table>
| **Compulsory** REVISION comments | 1. All figure do not include SD. Is that means that these experiments have been carried out once only?!  
2. Figure 3.7 is just a collection and sum of figure 3.1 to 3.6. This is repeating to the same results. Please choose to either delete Figure 3.1 to 3.6 and leave Figure 3.7 (I prefer this) or do the other way around.  
3. Again Appendix I is summarizing the same data of Figure 3.7. This is repeating to the same data in two different ways. |
| **Minor** REVISION comments |                                                                                                                                   |
| **Optional/General** comments |                                                                                                                                                                   |
