

SDI Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_47990
Title of the Manuscript:	Effect of Ionic Activity Coefficient of ionic salt on Demulsification of soy Lecithin Oil-Water Emulsion
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>The abstract was well presented with clear objectives, methodology, results and conclusion.</p> <p>Typing error – line 14 and 297 for word pH.</p> <p>Figure 1a and 1b – size to small, presently not clear.</p> <p>The subtopic in the results and discussion are not in sequential order.. 3.1 follow by 4.2.. follow by 4.3.. follow by 3.4.. follow by 3.5. The author should double check the format before submitting this article.</p> <p>Results and discussion have been presented with good observation of the data. However, there is a lack of scientific explanation for all observations in this article.</p> <p>For example: "The salt as Lewis acids destabilizes the emulsion or decreases the lifetime of the emulsion". What is the reaction of the Lewis acid toward this observation?</p> <p>Technically, the author should explain more detail on the reaction of each parameter that's used for the effect of ionic activity coefficient of ionic salt on demulsification of soy lecithin oil-water emulsion.</p>	
Optional/General comments	Generally, this article can be published after a minor correction have been done by the author.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
