

SDI Review Form 1.6

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_50288
Title of the Manuscript:	Morpho-physiological Basis of Yield Performance of Early Maturing Rice Varieties in Bangladesh
Type of the Article	Missing it should be written as an original article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Abstract-</p> <ol style="list-style-type: none"> The abstract needs to be reformatted with basic information and language errors. All the comments are given in the manuscript. <p>Introduction-</p> <ol style="list-style-type: none"> In the introduction, a few statements require references that are not mentioned in the manuscript. Introduction needs to add some more information on rice morphology and physiology, which have already been published in referred journals. Therefore, it will become more interesting introduction. <p>Methods and materials-</p> <ol style="list-style-type: none"> This section of the manuscript is very important and it should be written with all the basic methodology used in the study. All the comments given in the manuscript should be addressed. <p>Results and discussion-</p> <ol style="list-style-type: none"> The results are well written and explained. However, some figures need to be reformatted and all the comments are given on the reviewed figures. 	
Minor REVISION comments	–	
Optional/General comments	Overall, it is a good story line for plant breeders who really need morphological and basic physiological information about well-adapted and released varieties for developing and improving good landraces and traditional varieties based on morphology and physiology contributing in higher grain yield in rice crop.
