

Editor's Comment:

I have started to review the paper and was really disappointed with its quality (that is why there were no further comments).

First of all it concerns the language and grammar.

I have added some marks in the paper,

overall - references are incorrect, proofreading is urgent, SWOT-analysis is rather shallow.

The manuscript can be adapted to the travel journals, but is not suitable for a scientific one.

Also the presentation of the data is poor.
